

Our hospital is proud to participate in the RARE Campaign, working to maintain our patients' health after their hospital stay...

...so they and their families can sleep more peacefully in their own beds.

The RARE Campaign seeks to prevent 4,000 avoidable readmissions in Minnesota by December 31, 2012. The campaign is led by the Institute for Clinical Systems Improvement, Minnesota Hospital Association, and Stratis Health, and supported by numerous health community partners.
